

movements

a succession of figures

fluid

skin tendon muscle bone

an arched form

gathered

light & slow air

\*

ranges of bone

soft

‘sensation is perception’

folds layers

branches

delicate

beneath the skin

\*

touch is active

weight

less weight

whorls

ripples

particles in constant movement

dissolve

\*

graceful, effective

be slow

slow

changes

bend towards

\*

ribbons of movement    tracery

sliding spaces

inbetween

tracery web of fibres breathing

soft spaces

inbetween

\*

even still    it's active

flicker

elide,    torque

3.

the tempo of moonlight as opposed to other light

4.

fascination

this unique uncoiling

permitting graceful curve  
of form

the surface

touch of rain

change is effected

empty becomes quickened

deepened

collecting time

handle

with gentle touch

millions

a fragile

shimmering

millions

a continuous line

their beauty a long way off

where rain is
